## PROFESSIONAL SUMMARY

Full-Stack Developer focused on building modern web applications, SaaS platforms and scalable systems.

Currently developing FlowJersey, a multi-tenant SaaS platform built with Next.js, TypeScript and PostgreSQL.

I have a strong interest in software architecture, application security and scalable systems.

## KEY SKILLS

### SaaS Architecture

Building scalable multi-tenant platforms.

### PostgreSQL

Relational modeling and query optimization.

### Next.js & TypeScript

Modern web apps with static typing and performance.

### Application Security

Authentication, RLS, rate limiting and API protection.

### Cloud Infrastructure

Deploy, CDN, DNS and protection via Cloudflare.

### REST APIs

Backend integration, validation and service architecture.

## FEATURED PROJECT

### FlowJersey

Featured Project · SaaS · Multi-Tenant · In Development

Multi-tenant SaaS platform built for creating and managing online stores.

Includes secure authentication, per-tenant data isolation, admin dashboards, subscription system, Stripe integration and advanced management features.

Designed with a focus on scalability, security and user experience.

#### FLOWJERSEY IN NUMBERS
